Legal notice.

Our catalogue is only intended for buyers who wish to use the goods and services exclusively within the scope of their independent professional, commercial, official or business activities and not for private individuals. All information on goods and services is non-binding and does not constitute a legally binding contractual offer, but only a so-called „invitatio ad offerendum“ (an invitation to submit an offer). **If prices are stated in the catalogue, these are indicative and non-binding industry prices in EUR (for stand see back of catalogue) plus statutory VAT. In addition, if applicable, there are costs for finishing and other ancillary costs such as packaging, shipping and transport costs, customs duties etc., as well as (if applicable) the statutory value added tax.** The product illustrations are not binding. We will be pleased to send you a sample for a precise assessment of the guaranteed properties and functions as well as the colour accuracy of a product. This sample is binding for placing an order. In the case of articles with advertising imprint, we will be pleased to provide you with a proof sample for binding approval of the print, the printing stand and the product characteristics. All articles

with customer imprint shown in this catalogue are only for the performance presentation of the printing technology and for reference purposes. The rights to the illustrated logos and brand names as well as to the illustrated custom-made products belong exclusively to the respective copyright/brand owners. Please note that in the case of set items which are marked „Made in Germany“ or „Made in Europe“, it is possible that not all individual components of the set are manufactured in Germany or Europe. However, it goes without saying that the main manufacturing or processing steps for sets marked accordingly are carried out in Germany or Europe (depending on the marking). Only the laws of the Federal Republic of Germany apply to the contractual relationship. The UN Convention on the International Sale of Goods (CISG) and the referral provisions of German international private law (IPR) shall not apply.

PROMOTION
for life.

elasto has been making brands tangible since 1980 and offers solutions to convey individual messages – with the commitment to service of a family-owned company.

Our versatile repertoire guarantees an all-round positive brand experience: we rely on sustainable plastic production and finishing 'Made in Germany' as well as efficient global sourcing. Our focus is on articles that inspire through their benefits - and also make an impression in terms of sustainability.

SUSTAINABILITY.

We give back more than we use!

In economic, ecological and social terms: Because what we do today determines what the world will look like in future. We are therefore committed to a holistic sustainability strategy and to products that fulfil these standards.

**Resource
efficiency**

**Investments
in eco-friendly
systems**

**Utilisation of

**Strengthening of
Made in Germany
production**

Investment in environmentally friendly systems and concepts.

Circa **16.5 Mio. €** Investment in a **sustainable and efficient injection moulding facility and toolmaking shop**, as well as a **resource-efficient new logistics and production centre**.

1560 solar modules

alone on the logistics centre
in Sulzbach-Rosenberg.

These deliver an **output of 580,000 kWh** per year.

This enables us to **save emissions** totalling **273 t CO₂**

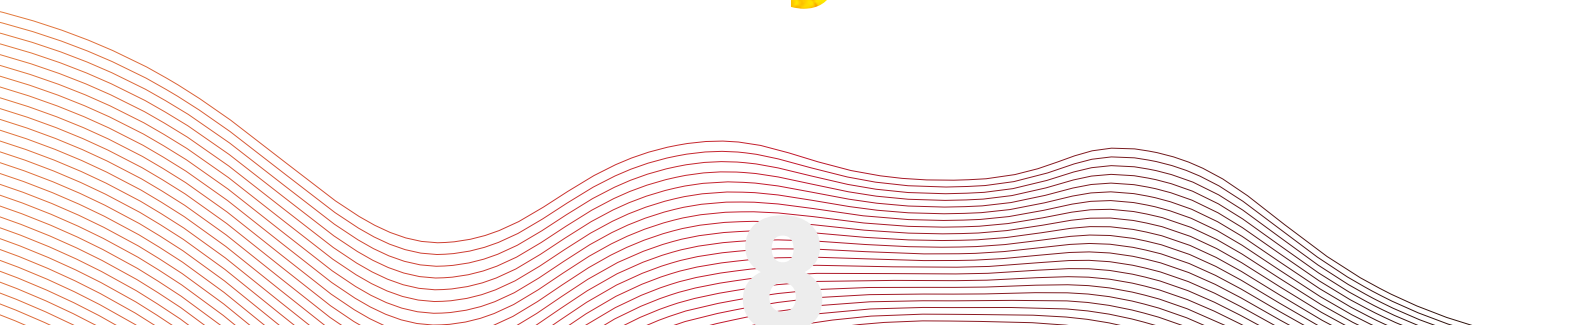

88% of our **vehicle fleet** has already
been converted to **electric and hybrid**.

45% of the products in our range
are **Made in Germany**.

MADE IN
Germany.

Everything from a single source - our own plastics production, finishing and mould construction at our Bavarian site.

The designation of origin 'Made in Germany' enjoys a high reputation and is recognised worldwide as a guarantee of quality. After decades in which production in the Far East boomed, there has been a noticeable rethink in recent years. For some time now, regional production and finishing have been increasingly taking centre stage. After all, domestic production also means supporting German companies and thus complying with German quality standards. Shorter production times, flexible ordering processes and many other advantages can be derived from this.

Quality Made in Germany.

Advantages of 'Made in Germany'.

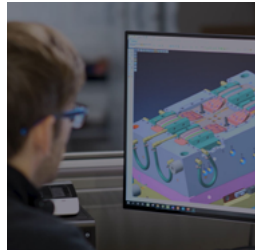

- ✓ High quality standards.
- ✓ Short transport routes.
- ✓ Planning reliability.
- ✓ Fast delivery times.
- ✓ Well-thought-out, functional product design.
- ✓ Fast and uncomplicated order processing.
- ✓ Job security.
- ✓ Strengthening Germany as a business location.

TOOLING.

Customised solutions in all branches of industry.

Whether it is 3D prototyping, individual or overall project work, technical advice, repairs or the supply of spare parts - elasto offers individual options as well as comprehensive service from a single source.

Flexibility and speed are top priorities in elasto's toolmaking. With 'Made in Germany' production and advanced machinery, we offer 5-axis CNC milling, wire cutting, deep-hole drilling, die-sinking EDM, and rapid prototyping.

Qualified experts.

Our team of qualified experts possesses extensive knowledge and years of experience, enabling them to understand your unique requirements and develop tailored solutions.

We work closely with you to meet your specific requirements and provide you with the best possible quality.

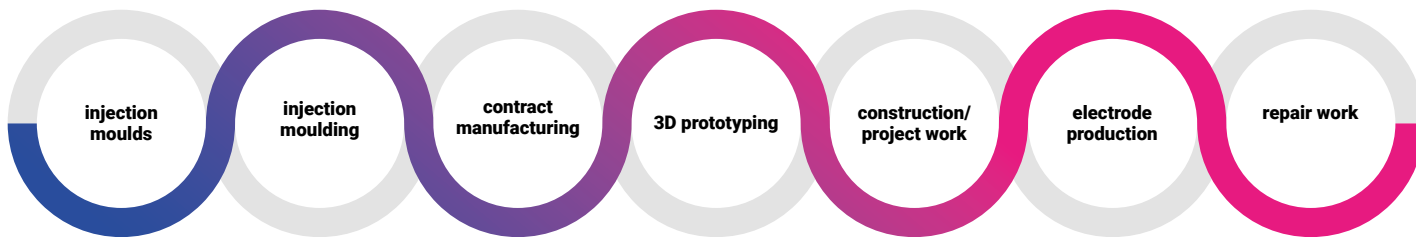

No matter what industry you're in, our mould and tool shop offers the expertise and commitment to meet your

needs. We understand the importance of efficiency, reliability and precision to your success and apply these values to every project.

Flexible production „Made in Germany“.

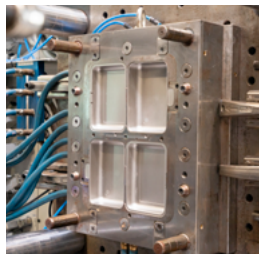

Our modern machinery enables 5-axis CNC milling, wire cutting, deep-hole drilling, die-sinking EDM and rapid prototyping.

This comprehensive package forms the foundation for fast and flexible production, proudly „Made in Germany“.

INJECTION MOULDING.

Our modern plastic injection moulding plant at our headquarters stands for quality, flexibility and innovation. As recently as 2025, we invested 4 million euros in the modernisation of a new hall – a clear commitment to Germany as a business location. With 50 injection moulding machines, including modern multi-component systems, we produce up to 250,000 items per day in an almost unlimited range of colours. Whether standard products or customised special designs – our experienced specialists guarantee reliable processes and maximum precision.

FINISHING.

In our in-house print shop at the company headquarters, technology meets precision: we finish your products directly on site – quickly, to a high standard and customised. Specialising in a wide range of processes, we offer screen printing, laser engraving, PremioTouch and many other finishing techniques. With state-of-the-art machines and a trained team, we realise detailed print images, long-lasting engravings and high-quality surface finishes.

LOGISTICS.

Our logistics are designed for efficiency and speed: We store thousands of items on 11,500 m² for immediate dispatch. In 2021, we opened our new warehouse and logistics centre with an integrated automated small parts warehouse – a milestone for our shipping processes. We handle around 120,000 parcels and 15,000 pallets every year. Thanks to intelligent warehousing, sophisticated import and export management and fast-lane delivery, we guarantee reliable delivery – even when demand is high and quantities are large. This means your order arrives quickly, safely and punctually.

REFINING.

Refinement with impact - making your brand visible.

Whether eye-catching, discreet or exclusive – we transform your promotional items into customised brand ambassadors.

With a variety of modern finishing processes, we offer you exactly the solution that suits your product and your message. From screen or pad printing and brilliant digital printing to precise laser engraving or detailed iMould – each technique has its own particular strengths. Together, we will find the perfect finish to showcase your brand in the best possible light – long-lasting, high-quality and unique. We accompany you personally through every step - from the initial idea to the finished product. Benefit from our expertise, our flexibility and our promise of quality 'Made in Germany'.

15

SCREEN & TRANSFER PRINT.

In screen printing, the colour is applied directly to the material through a fine-mesh fabric using a rubber squeegee. Areas that are not to be printed are covered with a stencil. This process is particularly suitable for flat, smooth surfaces - such as throwing discs or slightly conical shapes like bottles.

With transfer printing, the motif is first printed on a carrier film and then transferred to the product. Ideal for finishing textiles such as cotton or nylon.

Advantages.

- ✓ Opaque colours
- ✓ High resilience of the print motif
- ✓ Special colours such as Pantone or HKS possible

TAMPO PAD PRINT.

Tampo pad printing is an indirect process in which the ink is transferred from the printing form to the product via an elastic silicone pad. It is particularly suitable for uneven, curved or textured surfaces - such as ballpoint pens, yo-yos or other plastic items. This means that even complex shapes can be printed cleanly and precisely.

Advantages.

- ✓ Photorealistic printing (4C) and gradients (special colour or 4C) also possible on request
- ✓ Uneven surfaces with indentations or curvatures can be printed
- ✓ Very fine details can be printed

EMBROIDERY.

In embroidery, a textile is embellished by sewing on or pulling through threads. Before the material can be embroidered, the graphic must be processed with an embroidery programme and simplified if necessary. This file is forwarded to the embroidery machine where the textile is embroidered using a hoop. Embroidered promotional items are perceived as particularly high-quality and classy. As a result, promotional items embellished with embroidery easily find a place in everyday life.

Advantages.

- ✓ Embroidery with up to 15 standard colours possible (further colours on request)
- ✓ Embroidery as a lively, effective advertising and high-quality type of finishing
- ✓ Suitable for almost any type of textile
- ✓ Very robust and therefore lasts a textile's lifetime

SUBLIMATION PRINT.

Sublimation printing refers to the printing process in which the dye is vaporised (sublimated) into the carrier material. Transfer papers and foils as well as dyes or special inks are used for this, which are usually sublimated onto synthetic fibres. The main advantage of sublimation printing is that different materials can be printed in photo quality. The print is also highly resistant to UV radiation and other environmental influences.

Advantages.

- ✓ Robust finishing in optimum photo quality
- ✓ Screenless reproduction of halftone originals
- ✓ No lithos, printing plates and pre-press costs
- ✓ Scratch and weather resistant

IMOULD.

The iMould process involves back-injecting film into the thermoforming or injection moulding tool, which was first printed using digital printing or offset printing. iMould finishing is a very high-quality and expressive way of realising the motif in a photorealistic and cost-saving manner. This process is mainly used to finish plastic items with a flat surface (e.g. storage tins, trays, snow flies or throwing discs).

Advantages.

- ✓ Robust finishing in optimum photo quality
- ✓ Screenless reproduction of halftone originals
- ✓ No lithos, printing plates and pre-press costs
- ✓ Scratch and weather resistant

UV-DIGITAL PRINT.

UV digital printing is a printing process that can be categorised as large format printing. It enables the printing of almost all materials. After printing, the surface of the substrate is hardened with UV light. This means that plastic items with a flat surface (e.g. sliding puzzles, parking discs, ice scrapers, magnets or rulers) can be printed within a very short time.

Advantages.

- ✓ Robust finishing in optimum photo quality
- ✓ Screenless reproduction of halftone originals
- ✓ Favourable prices - even for small print runs
- ✓ No lithos, printing plates and pre-press costs

PREMIO TOUCH.

The innovative PremioTouch printing process enables unique finishing of the items to be printed. In this process, items such as drinking bottles are printed in three steps. The first step is a white underlay, in the second step the actual motif is printed and in the third step a varnish is applied over the printed area. The haptically noticeable elevation and the brilliant colours of the printed motif ensure a special finish and make this printing process unique.

Advantages.

- ✓ Robust finishing in excellent photo quality
- ✓ Screenless reproduction of halftone originals
- ✓ No lithos, printing plates and pre-press costs
- ✓ Small quantities available from 1 piece
- ✓ All-round printing possible
- ✓ Special haptics

LASER ENGRAVING / CO2 LASER.

The term CO₂ laser refers to the labelling or marking of objects using an intense laser beam. This finishing process is used to refine wooden products, for example. An engraving lasts a very long time, does not fade and is also waterproof and smudge-proof.

Advantages.

- ✓ Long-term advertising impact thanks to robust finishing
- ✓ Variable characters and graphics of any type and size are possible
- ✓ Small print runs from 1 piece possible
- ✓ Engraving on metal, wood and sometimes even on plastic possible

FAST LANE PRODUCTION.

When things have to go fast!

Forgotten an event? Or urgently need branded products for the next promotion?

No problem - with our FASTLANE service, we can get your brand up and running in no time at all! From now on, selected items can be produced ready for dispatch within 48 hours of approval of the print status sketches.

Whether trade fair, promotion or last-minute campaign - we make sure that your products shine on time!

Fast. Reliable. Strong brands.

Discover items in the FASTLANE range now and get started!

Advantages.

- ✓ High-quality finishing on selected products using laser engraving/CO₂ laser.
- ✓ Ready for dispatch 2 days after approval of the artwork.
- ✓ Applies to a quantity of up to 1000 items.

24

25

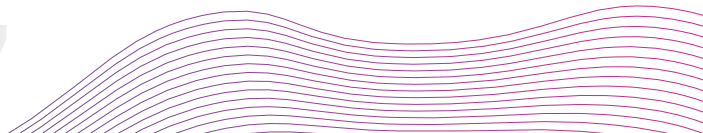

GLOBAL Sourcing.

Limitless possibilities - powerful global sourcing.

Everything, worldwide, simple. True to our location, we strengthen production and finishing 'Made in Germany' - at the same time, we follow innovations and trends on international markets to expand our extensive product range. As an experienced importer, we have a well-developed global network of suppliers and partners. This means we are optimally networked worldwide and utilise innovative supply chain management within reliable international structures.

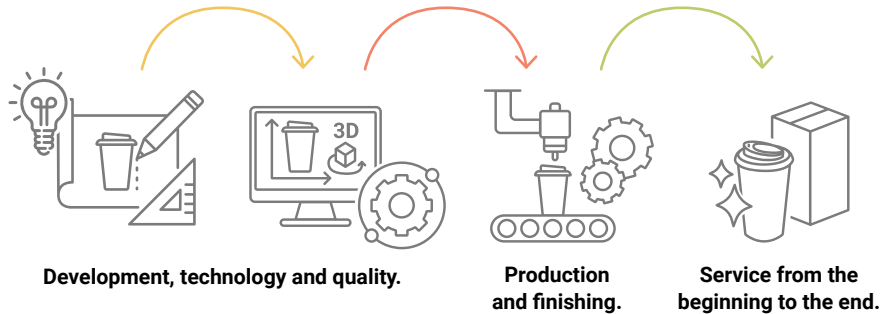

CUSTOMISED PRODUCTS.

We turn your ideas into reality with unique branding.

We create and develop the complete solution based entirely on your ideas and requirements, ensuring that everything is 100% customised and from a single source.

We give your ideas a special edge. Within a very short time, we are able to produce unique articles ready for series production. We place particular emphasis on customer proximity and personal consultation throughout the entire process.

YOUR IDEA. OUR EXPERTISE. ONE UNIQUE PRODUCT.

Customised advertising material - 100% tailored to you.

We fulfil even the most extraordinary requests for customised products...

...And yes, even action figures that look like you.

3D figures.

- ✓ Available from 1 piece or in serial production starting from 100 pieces.
- ✓ 100% individual - each figure is unique.
- ✓ Optionally available with accessories or shake head.
- ✓ Perfect as a gift.

**Your
individual
figure.**

NEW PRODUCTS.

TRIVEO

born for infinity.

TRIVEO is the new definition of glass: strong, clear, elemental.
Each piece combines the precision of German manufacturing with the lightness of modern design.

The characteristic pentagon design reflects light like cut crystal –
inspired by nature, designed for the moment and beyond.

TRIVEO is made of high-quality Tritan™, is shatterproof, dishwasher-safe
and remains crystal clear even after countless washes.

The Future of Glass.

38

TRIVEO TUMBLER.

Item no.: 02394

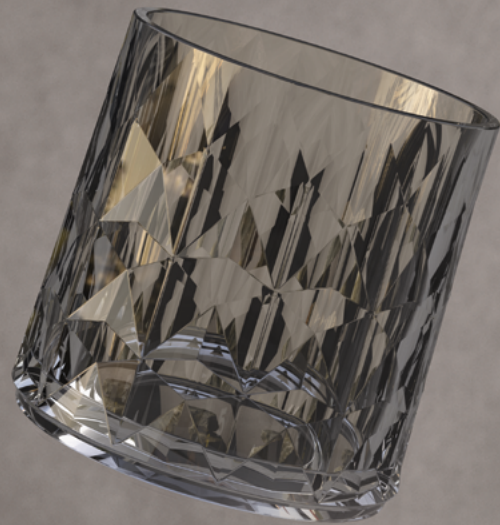

The TRIVEO tumbler is the heart of the brand.

Made from Tritan™, it is both a highlight product and a promise: the origin of the design language, the archetype of a new generation of durable glasses, inspired by the geometry of nature.

More glasses will follow in 2026.

CLEAR BENEFITS.

- ✓ Made in Germany
- ✓ Integrated calibration mark
- ✓ Dishwasher safe
- ✓ Also available in ISCC-certified RENEW Tritan™
- ✓ High-quality laser engraving possible
- ✓ Haptic logo integration available on request
(plus one-time tooling costs)

Plant-based bioplastic.

MADE IN GERMANY

What is bioplastic?

Bioplastics are environmentally friendly alternatives to conventional plastics.

Bioplastic consists of carbohydrates (e.g. maize or sugar cane) mixed with mineral fillers.

The basic building material of the plant-based plastic is carbohydrates, which are converted into plastic through chemical processes. The carbohydrates thus replace crude oil.

They are bio-based, can be biodegradable or long-lasting and offer a more sustainable option for reducing dependence on fossil raw materials in plastics production. The market for this has been growing for several years.

Benefits.

- ✓ Resistant and robust bioplastic.
- ✓ 100% recyclable.
- ✓ Dishwasher safe.
- ✓ Sustainably manufactured in Germany.

Our product range made from bioplastic.

CHARGING CABLES

Compact and practical.

Whether it's a city trip, outdoor adventure or a working day on the road - with our chargers and power banks, you'll never run out of juice! Powerful, compact and stylish, they ensure that your devices are always ready for use. Whether smartphone, tablet or headphones - our mobile energy suppliers combine modern design with reliable technology for maximum freedom on the go.

Charging cable „Power“, 5 in 1 02176

The 'Power' charging cable impresses with its versatile charging options and practical extras. As a USB data cable with a retractable cable and integrated mobile phone holder, it offers maximum convenience. With USB-A and USB-C inputs as well as USB-C, micro USB and 5-pin Lightning outputs, it is suitable for many devices. The charging power of 21.838 watts ensures fast charging. The integrated bamboo wood rounds off the design naturally.

Plastic/ABS

100 mm x 60 mm x 22 mm

200 Unit, Individual carton

Quick-charging cable „Flexi“, 5 in 1 02175

The „Flexi“ charging cable is the sustainable choice for flexible charging options. Made from recycled ABS, it combines environmental awareness with functionality. As a USB data cable, it offers inputs for USB-A and USB-C as well as outputs for USB-C, micro-USB and 5-pin Lightning. With a charging power of 22.185 watts, it ensures fast and efficient charging of a wide range of devices.

Plastic/TPE

250 Unit, Individual carton

1180 mm x 28 mm x 7 mm

128

Charging cable „Connect“, 4 in 1 02174

The „Connect“ charging cable is the environmentally friendly solution for versatile charging. Made from recycled aluminium, it impresses with its style, durability and functionality. As a USB data cable, it can also be used as a multi-charging cable. With a charging power of 22.44 watts and USB-A input and USB-C, micro USB and dual 6-pin Lightning output, it ensures fast, efficient charging.

 Metal/Aluminium

 250 Unit, Individual carton

 105 mm x 23 mm x 14 mm

Mobile phone chain „Universal“

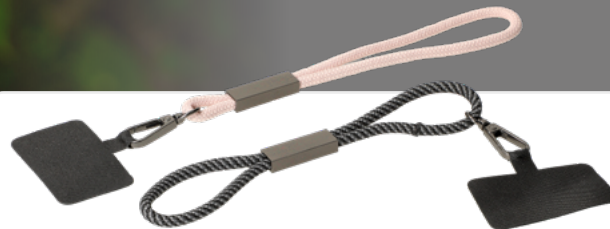

02046

The universal mobile phone lanyard is the perfect gadget for anyone who wants to keep their phone within easy reach while keeping their hands free. The cord is timeless in colour and can be adjusted up to a maximum length of 82,5 cm. The mobile phone lanyard features a pad that is compatible with all standard, semi-closed smartphone cases.

 Textile/Polyester

 836 mm x 58 mm x 6 mm

GUIDELINES & REGULATIONS.

Toys.

All offered children's toys comply with the European Directive 2009/48/EC on the safety of toys and the EN 71 series of standards. Toys may be unsuitable or dangerous for children of a certain age due to their function, dimensions, features, characteristics or other reasons. To further improve safety, the toy comes with warnings informing the consumer of the potential danger posed by the toy.

The following are the warnings that apply to the individual articles. Next to the offered items in this catalogue are small numbers that match the listed warnings.

1. Attention! Not suitable for children under 3 years, because of small parts that can be swallowed.
Choking hazard!
2. Attention! Not suitable for children under 3 years.
Risk of injury due to long cord.
3. Attention! Not suitable for children under 3 years.
Danger of strangulation and tripping due to long cord.
Do not use near power lines or during thunderstorms.
4. Attention! Use under the direct supervision of adults.
Not suitable for children under 3 years. Danger of falling! The sled requires great skill in steering and braking, so learn to use it on flat, safe terrain.
Use only by one person at a time.

5. Attention! Use only in shallow water under adult supervision. This is not a buoyancy aid!
No protection against drowning!
6. Attention! Do not aim at eyes or face.
7. Attention! Use under the direct supervision of adults.
Liquid can be swallowed!
8. Attention! Sharpener contains a sharp edge due to its function.
Risk of injury!
9. Attention! Not for transporting children!

0+ to 8+

All information with „+“ is to be understood as an age recommendation or as an educational note.

Sporting items, fan items, decorative items.

The sports, fan and decorative items offered in this catalogue are sold as such. In order to prevent possible confusion with toys, these items are marked with the following inscription.

Sport „Sporting goods - Not toys!“

Fan „Fan items - Not a toy!“

Deco „Decorative items - Not a toy!“

GENERAL INFORMATION.

REACH.

All offered articles comply with the European Regulation No. 1907/2006, Registration, Evaluation, Authorisation and Restriction of Chemicals. The EU's objective is to produce and use chemicals in such a way as to minimise adverse effects on human health and the environment.

Customer information.

We hereby confirm, in accordance with Article 59 (1, 10) of the EC- Regulation number 1907 / 2006 (REACH), that articles delivered by us do not contain substances of the candidate list above 0.1% mass. We undertake to regularly compare our products with the substances specified in the candidate list in accordance with the REACH Regulation. Insofar as we determine that our products comply with Art. 33, we will inform you about this immediately and take appropriate measures in individual cases.

Please understand that we do not have the items in stock in all colours of our standard colour palette. Ask our sales staff for the available colours, minimum quantities and colour surcharges. We print exclusively with physiologically harmless inks. The disposal of the paints and screens is carried out in a closed system. Screens are recycled after use for technical reasons. For repeat orders, the sieve must be recreated and calculated.

For imprints, we need a copyable black-and-white original or a film 1:1, with transfer motifs reversed. In the event of necessary changes to your originals or multi-colour films, we will charge you the lithographic costs incurred by us. However, we will inform you in advance and make the changes only with your permission. It is also possible to create individual designs and final drawings on request. These will be invoiced by us at cost. An exact reproduction of the desired shade depends on the colour and condition of the item. For darker surfaces, white may be required.

Deliveries to new customers and abroad are made against prepayment or cash on delivery or irrevocable letter of credit.

The contractual relationship shall be governed exclusively by the laws of the Federal Republic of Germany. The UN Convention on the International Sale of Goods (CISG) and the referral provisions of German Private International Law (IPR) do not apply.

Some images have been partially processed with AI.
Errors and misprints excepted.

MEMBERSHIPS.

CERTIFICATIONS.

TAW Certification | taw-cert.de

elasto GmbH & Co. KG and its subsidiaries have been certified according to the quality management standard DIN EN ISO 9001 since November 1999. Streamlined processes and documented work processes guarantee absolutely safe, economical and customer-oriented procedures and products. Compliance with these standards is regularly monitored by TAW and brought into line with current standards.

Das Zeichen für
verantwortungsvolle
Waldwirtschaft

FSC Certification | fsc-deutschland.de

Since October 2015, elasto has been FSC-certified and can offer wood products bearing the FSC logo.

FSC (Forest Stewardship Council) stands for ecological and socially responsible forestry, and for the avoidance of unchecked deforestation, the prevention of the violation of human rights and the prevention of environmental impacts. With the certification, elasto guarantees complete traceability in the product chain from the wood origin, to production, separate storage, trade and distribution of FSC-certified wood products.

ISCC Certification | iscc-system.org

As of 2022, elasto is the first German producer in the advertising materials sector to be ISCC PLUS certified.

ISCC (= International Sustainability and Carbon Certification) is an independent, global certification system that works on a voluntary basis across the entire supply chain. It verifies the sourcing of sustainable raw materials and the creation of ecologically valuable products made using these materials.
